

DRB GROUP STATEMENT: COVID Response

DRB Group can supply you with complete COVID secure engineering solutions:

Following the recent Government announcement DRB Group will continue to provide critical support in the form of repairs, maintenance, and development of new equipment for our customers including the NHS. We continue to review and monitor the situation.

If required, DRB can provide engineers to be set up on-site at your premises, and work within your “bubble”. With full virtual access back to our comprehensive mechanical & electrical workshops, there won't be any compromises to our capabilities. We operate a ‘one man – one van’ system.

All our engineers are equipped with comprehensive PPE over and above government guidelines and follow a COVID secure collection and delivery service.

Here at our Deeside office, we operate a full COVID secure cleaning cycle. From our office space to our machines on the shopfloor, this is carried out on an hourly cycle.

DRB offer a full virtual platform to discuss requirements with our design team, which includes the option to review and discuss projects using our 3D modelling software, as well as digital video conferencing facilities.

To us, this is a time to show support for each other and help to keep businesses running safely. We are proud to serve our customers, and our workforce are united in looking after themselves and each other, at the same time as working hard to keep the United Kingdom running.

For any more information please contact DRB on 01244 280280 or email enquiries@drbgroup.co.uk
